DDL OMNI Awarded AIREM Contract to Support Test and Evaluation Squadron ONE

McLean, Virginia, May 3, 2010 – DDL OMNI Engineering LLC is pleased to announce the award of Contract No. N57023-10-F-2016 for technical and analytical services in support of the Air Readiness/Effectiveness Measurement (AIREM) program at Air Test and Evaluation Squadron ONE (VX-1), located in Patuxent River, MD. This contract was awarded on April 29, 2010.

DDL OMNI will support the execution of the AIREM program in the definition, conduct and analysis of structured tactical development of airborne ASW systems and analysis for Fleet airborne ASW capabilities. The program will examine Air ASW sensors, systems and platform performance as well as examine the suitability of Tactics, Techniques and Procedures relating to employment of these systems. Work will be performed onsite at VX-1, Naval Air Station, Patuxent River, MD; at DDL OMNI's Simulation & Systems Division office in Virginia Beach, VA; and at DDL OMNI's corporate office in McLean, VA, under the direction of Thomas K. Cole, Vice President.

"AIREM is a strategically important contract for our company. We look forward to the challenge of producing high quality analysis in support our nation's defense," said Jim Schaeffer, Chairman, President and CEO.

DDL OMNI is an engineering and technical services company whose capabilities include systems engineering and analysis, materials and structures engineering, design and prototyping, operations research, information technology, program management and acquisition support, logistics engineering, distributed simulation and wargaming, environmental services, and award-winning web design and development services.

The company is headquartered in McLean, VA, with offices in Virginia Beach, VA; Newport, RI; Norwich, CT; and San Diego, CA. Personnel also serve at government facilities in Groton, CT; Newport, RI; White Sands, NM; San Diego, CA; and Pearl Harbor, HI.
