

# DDL OMNI Wins Record 10 Awards in Design Competition

---

**McLean, Virginia, October 20, 2009** – DDL OMNI is pleased to announce that it has once again received national honors in the 2009 American Graphic Design Awards competition, winning a record 10 awards for logo, website, CBT, and touchscreen interface design. This win marks the seventh time DDL OMNI has been recognized in the annual competition.

Presented by Graphic Design USA and sponsored by NewPage®, the four decade-old competition is one of the most prestigious in the industry, honoring design excellence across all media including print and collateral, corporate identity/logos, internet/interactive design, and more. Also one of the most selective, only 15 percent of the more than 8,000 entries were honored this year with an Award Certificate of Excellence.

DDL OMNI's 2009 awards highlight the team's skill in implementing effective designs in a wide variety of applications:

Defense Sciences Office Logo

DDL OMNI's winning designs will be published in the 250-page *Graphic Design USA Annual*, which will also be posted online at [www.gdusa.com](http://www.gdusa.com). The printed *Annual* is distributed in December to graphic industry leaders nationwide and circulated by Graphic Design USA throughout the year.

Since 2001, DDL OMNI has won a total of 37 industry awards for web, print, exhibit, and logo designs. "Once again, Graphic Design USA has recognized DDL OMNI for our efforts to create visually engaging graphics and designs for our clients. As in previous years, our work has been recognized in a number of media formats, from static logos to multimedia presentations. Creating award-winning digital designs in so broad a reach of media requires designers who are able to take advantage of unique features of each medium to tailor a product to our clients' needs," said Peter Caylor, Vice President, IT Division.

*DDL OMNI is an engineering and technical services company whose capabilities include systems engineering and analysis, materials and structures engineering, design and prototyping, operations research, information technology, program management and acquisition support, logistics engineering, distributed simulation and wargaming, environmental services, and award-winning web design and development services.*

*The company is headquartered in McLean, VA, with offices in Virginia Beach, VA; Newport, RI; Norwich, CT; and San Diego, CA. Personnel also serve at government facilities in Groton, CT; Newport, RI; White Sands, NM; San Diego, CA; and Pearl Harbor, HI.*
