

## Anytime, Anywhere Collaboration Solutions

One of the key strengths of our Software, Web and Systems Development support is our ability to help customers effectively manage projects and achieve common goals through web-based collaboration. Whether the requirement is a next-generation social publishing system or a large-scale corporate document management and real time communication capability, our customers count on us to provide the right solution **quickly** and **cost effectively**. Over the past 10 years, we have implemented more than 50 collaboration systems for our federal government customers.

We don't sell one software solution. We have expertise in a variety of proven and emerging collaboration tools to offer our customers the best solution for their specific requirements. With experience implementing both open and closed source tools, we build user-friendly, highly reliable, and scalable collaboration systems that leverage their current hardware and software investments. Our customized solutions offer—

### Streamlined program management

- Discussion and document sharing and review
- Data collection
- Task and milestone tracking
- Preservation of corporate/program history

### Improved communication

- Real-time communication, wiki, blog, IM
- E-meeting capabilities—virtual presentations, white boarding, audio/video web conferencing
- 3-D virtual environments

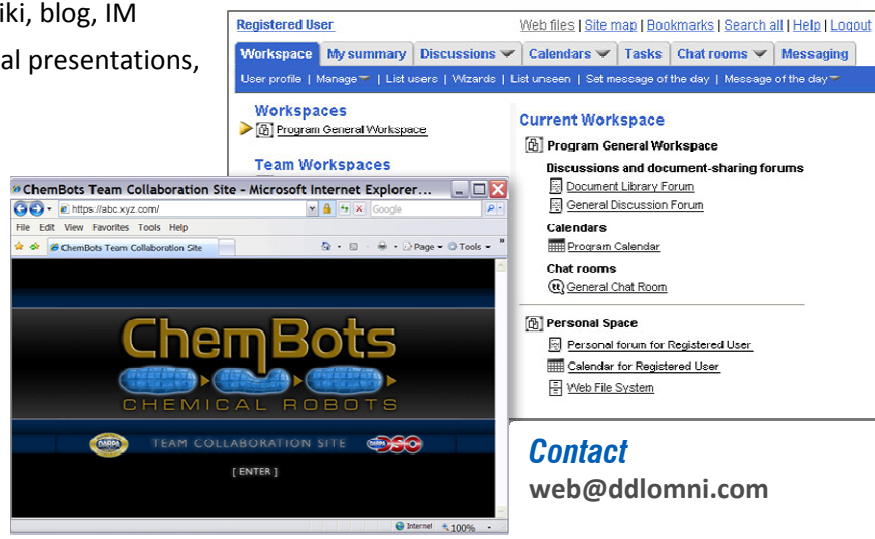

### Secure environment

- Password protection
- SSL encryption
- Multiple levels of access control
- PKI, single sign-on
